

Dear Doctor,

Thank you for taking care of us and saving lives.

Thank you for prescribing me the best medicines, and healing the unbearable pain I had every day, all the time.

Thank you for helping us not only because it is your job, but because you care for the people.

Even though your responsibility is not easy, thank you for treating us cheerfully.

Thank you for motivating the patients who are sick and are fighting with big diseases.

Thank you for always being there to help us, regardless of time.

Thank you for teaching me good habits I need to keep in mind for my health.

Thank you for taking out time to acknowledge the problems, being kind and patient. My family loves having you as their doctor, since they don't have to fear the pain or anything going wrong.

Thank you for making us believe in you and keeping the visits fruitful.

I am grateful to have a doctor like you, thank you for your timely consultation.

With respect,

A proud patient.
